

GMEC Subcommittees

Policy Subcommittee

Under the direction of GMEC, the Policy Subcommittee establishes and implements policies and procedures regarding the quality of education and the work environment for all residents in the ACGME and non-ACGME-sponsored programs here at the University of Connecticut School of Medicine. The Policy Subcommittee creates formal written policies and procedures governing resident duty hours that correlate with the institutional and program requirements. The Policy Subcommittee also helps to establish formal written institutional policies for selection, evaluation, promotion, and dismissal of residents that are in compliance with the institutional and program requirements. Once the subcommittee creates these policies, GMEC discusses and votes on implementation.
