

## **5.B.16**

### **Effect of Leave on Program Completion**

If a resident is on leave for any permitted reason and cannot complete the residency program within the time normally allotted, the program, with RRC approval, will be permitted to re-appoint the resident for an additional period of time equal to the amount of time needed to complete all required educational activities. No vacation will be allowed during the extended time to complete the program. If the RRC for that residency limits the number in the program, the Program Director will work with the resident to identify alternatives.
